Spotlight on Services

➤ **Customized Employment:** Customized Employment is a flexible process designed to personalize the employment relationship between a job seeker and an employer in a way that meets the needs of both. Customized Employment involves providing individualized services to job seekers and employers when individuals have complex employment support needs and require support services to obtain and maintain employment. An employment counsellor will work with a job seeker to assess their strengths, needs and interests to identify best-match scenarios between work environments, supports, client interests and work tasks. Customized Employment also involves the creation of unique employment opportunities, based on these best-match scenarios, by identifying, initiating or creating new jobs, carving existing jobs through negotiating to re-arrange work tasks or creating self-employment opportunities specifically customized to the job seeker's needs, skills, abilities and competencies.
